Professional Summary

Full Stack Developer with 10+ years of hands-on experience developing web applications and software solutions through freelance and project-based work. Experienced in building SaaS platforms, e-commerce applications, CMS solutions, business applications, and custom web platforms for international clients.

Strong expertise in React.js, Next.js, Node.js, TypeScript, JavaScript, PHP, Python, PostgreSQL, MySQL, MongoDB, and REST APIs. Experienced across the complete development lifecycle, including requirements analysis, application architecture, frontend and backend development, database design, API integration, performance optimization, testing, deployment, and maintenance.

Comfortable working independently or with distributed teams and communicating directly with clients to understand requirements, solve technical problems, and deliver production-ready applications. Experienced with AI-assisted development and modern vibe coding workflows using Claude to accelerate development, debugging, refactoring, and prototyping.

Technical Skills

Frontend: React.js, Next js, Angular.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap

Backend: Node.js, Express.js, NestJS, PHP, Python, Django, Server-Side Rendering (SSR)

Database: MySQL, Supabase, Mongoose, PostgreSQL, MongoDB, DynamoDB, Firebase, Knex, Sequelize

System Design: Software Architecture, Microservices, Design Patterns, Scalable Systems

APIs: RESTful APIs, GraphQL

CMS: WordPress theme and plugin development, WordPress customization, Shopify

Testing & Quality: Unit Testing, Integration Testing, Jest, Chai, Mocha, Code Reviews

Authentication & Security: JWT, OAuth, Authentication, Authorization, Secure API Design

Performance: Caching, Database Optimization, API Optimization, Load Balancing, Performance Optimization

AI-Assisted Development: Claude, AI-Assisted Coding, Vibe Coding, Rapid Prototyping, Code Generation, Debugging & Refactoring

DevOps: AWS, GCP, Vercel, Heroku, Docker, CI/CD, Nginx, Linux

Tools: Git, GitHub, NPM, Vite, PIP, Composer, Jira

Other Skills

Digital Marketing: Search Engine Optimization, Google Ads, Facebook Ads, Native Ads

Soft skills: Leadership, Collaboration, Communication, Visual Thinking, Problem Solving

Professional Experience

Full Stack Developer | Freelance & Project-Based

2016 – Present

- Delivered full-stack web applications and software solutions for international clients across SaaS, e-commerce, education, social platforms, content management, and custom business applications.
- Developed applications from requirements and technical planning through frontend development, backend development, database design, API integration, testing, deployment, and maintenance.
- Built production applications using React.js, Next.js, Node.js, Express.js, TypeScript, JavaScript, PHP, Python, PostgreSQL, MySQL, MongoDB, and REST APIs.
- Designed and integrated authentication systems, payment gateways, third-party APIs, analytics services, and external platforms.
- Designed database structures and optimized queries for applications using PostgreSQL, MySQL, MongoDB, and DynamoDB.
- Improved application performance through caching, database optimization, API optimization, frontend optimization, and code improvements.
- Built responsive and SEO-friendly interfaces using React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, and JavaScript.
- Developed custom WordPress themes, plugins, child themes, and Figma-to-WordPress implementations.
- Managed deployments and development infrastructure using AWS, GCP, Docker, Vercel, Nginx, Linux, and CI/CD.
- Worked directly with international clients to understand requirements, propose technical solutions, provide progress updates, and deliver production-ready software.
- Used Claude and AI-assisted development workflows for rapid prototyping, implementation, debugging, refactoring, and exploring technical solutions.

Full Stack Developer – Let's Mango

2021 – 2024

- Designed and developed scalable web applications across frontend, backend, database, and API layers.
- Worked with React.js, Next.js, Node.js, Express.js, MySQL, PostgreSQL, MongoDB, and REST APIs.
- Improved system performance by approximately 40% through optimization and caching.
- Implemented GitHub Actions CI/CD pipelines, reducing deployment time from approximately 2 hours to 15 minutes.
- Worked on application architecture, feature development, debugging, performance optimization, and production deployments.

Full Stack Developer — Upwork | Top Rated Freelancer

2017 – 2024

- Built custom SaaS, CMS, e-commerce, and business applications for international clients.
- Developed complete frontend and backend solutions based on client requirements and project specifications.
- Integrated payment gateways, third-party APIs, analytics tools, and external services.
- Built responsive applications optimized for desktop, tablet, and mobile devices.
- Worked directly with clients throughout the development lifecycle, from requirements gathering through deployment and post-launch improvements.

Freelance Web Developer – Fiverr

2016 – 2021

- Developed custom websites and web applications for international clients.
- Built responsive interfaces using React.js, JavaScript, HTML5, CSS3, and Bootstrap.
- Developed custom WordPress themes, plugins, and child themes and converted Figma designs into responsive websites.
- Developed custom administrative panels using PHP, MySQL, JavaScript, HTML, CSS, and Bootstrap.
- Implemented performance-focused frontend solutions achieving 95+ Google Lighthouse scores on selected projects.

Recent Key Projects

Sila AI — SaaS Traffic Protection Platform

https://sila-ai.com

Built a complete SaaS platform designed to identify and block **bot and VPN traffic from Google Ads campaigns** , helping advertisers reduce wasted advertising spend caused by unwanted or low-quality traffic.

- Developed the **backend using Node.js** to process and manage traffic detection and blocking workflows.
- Built the frontend application using **Angular.js** , providing dashboards and interfaces for managing traffic protection.
- Designed and integrated data storage using **MySQL and Amazon DynamoDB** .
- Developed the platform end-to-end, covering frontend, backend, database integration, application logic, and deployment.
- Implemented traffic detection workflows to identify unwanted **bot and VPN traffic** and prevent it from reaching advertising campaigns.
- Built the platform as a SaaS product with a focus on scalability, reliability, and reducing unnecessary advertising costs for customers.
